

## Radiologic Science Program Mission Statement

*The Radiologic Science program of Holy Family University is committed to the formation of integrated persons who possess knowledge and awareness of their responsibilities to God, humanity, and self. The program seeks to cultivate professional competence in graduates who are actively responsible in society for service to the human family. The program is designed to provide the radiologic science profession with a member who uses ionizing radiation in a diagnostic function to create images of the human body that are used to diagnose disease and injury.*
